

Natural History Study

DESCRIPTION

A non-interventional, longitudinal study in people with FOP designed to:

- Understand the relationship between new bone formation in FOP and clinical measures of physical function and quality of life
- Monitor disease progression over time

ELIGIBILITY CRITERIA

- Clinical diagnosis of FOP (Ages 0 to 65)

DESIGN

- Study will prospectively follow up to 100 people with FOP for up to 3 years
- Thorough baseline (at beginning of study) examination conducted to determine the current status of disease
- Participants evaluated annually, with more frequent visits if they experience a flare-up

CLINICALTRIALS.GOV IDENTIFIER:

NCT02322255

TRIAL ID NUMBER

PVO-1A-001
